

FortiGate SOHO/Branch Office Bundle

COMPLETE CONTENT PROTECTION SOLUTIONS

POWERFUL, INTELLIGENT & STATE OF THE ART

Just because your business or office is small doesn't mean your security problems are, too. Fortinet's award-winning FortiGate™ ASIC-accelerated security platforms stop viruses, worms, trojans, intrusions, spam, inappropriate web content and more at the edge of your network, **before** they can reach your PCs and servers. They are the only systems available that can screen all of your web and email traffic in real time; without degrading network performance.

Introducing the Smartest, Fastest, Most Powerful and Complete Security Systems available.

Fortinet security systems incorporate best-of-breed, ICSA-certified security functions in a single appliance that is a breeze to install and manage.

Offering industry-leading Unified Threat Management (UTM) security, including integrated Antivirus, Stateful Firewall, IPSec and SSL VPN, Intrusion Prevention Systems (IPS), Antispam, and Web Content Filtering; Fortinet systems combine the most comprehensive suite of security features with our exclusive FortiGuard™ Subscription Services in one complete bundle to automatically protect against attacks.

Fortinet's Complete Content Protection Solution includes:

FortiGate Security Appliance

FortiCare Support Services*

- Technical Support
- FortiOS Upgrades
- Hardware Warranty

FortiGuard Subscription Services*

- Antivirus Updates
- Intrusion Prevention
- Anti-spyware

and now also includes;

Antispam and Web Filtering

FortiGate-50A

FortiGate-60

FortiGate-60M

FortiWiFi-60

FortiGate-100A

The Fortinet Complete Content Protection Solution

FortiGate ASIC-based, multi-threat protection systems are bundled with FortiCare Support Services* and FortiGuard Subscription Services* to provide a Complete Content Protection Solution that is easy-to-install and simple to manage.

FORTIGATE. + FORTICARE. + FORTIGUARD. =

Content Protection Bundle Comparison

Fortinet's Complete Content Protection Solution delivers exceptional value compared to other security products for SOHO and Small Branch Office applications that rely on third party vendors. Fortinet is the logical choice for home and branch offices.

Product	Antivirus	IPS	Anti-Spyware	Antispam	Web Filtering	Users	Support
FortiGate	Yes	Yes	Yes	Included	Included	Unlimited	Yes*
Sonic Wall	Yes	Yes	Yes	Additional**	Additional**	Up to 10	Yes
Netscreen	Yes ¹	Yes	Yes	No	Additional**	Up to 10/25	Yes

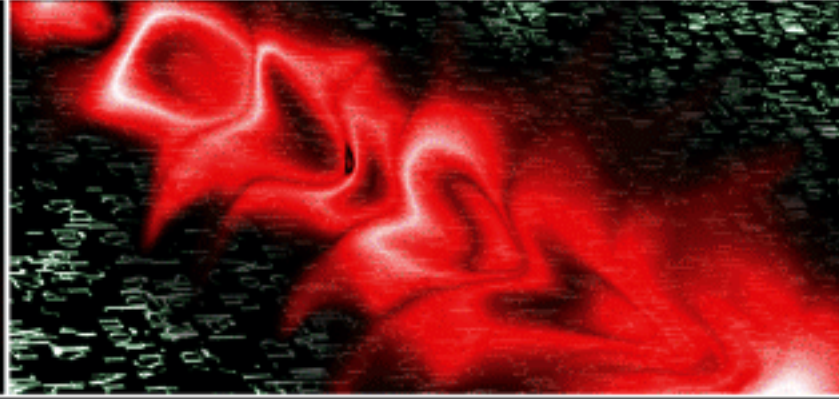

* 1 year (12 month) subscription included. Annual renewal required to maintain service(s).

** Feature available for an additional cost.

¹ Antivirus scanning not supported on all Netscreen models.

FortiGate SOHO/Branch Office Bundle

COMPLETE CONTENT PROTECTION SOLUTIONS

POWERFUL

Combine's Stateful Firewall, Antivirus, Intrusion Prevention Systems, IPSec, SSL-VPN, Antispam, Web Content Filtering and FortiGuard Subscription Services in a single security solution.

INTELLIGENT

Proactive real-time detection for network-based threats; viruses, worms, trojans, spyware and other malicious content to ensure that the latest attacks are detected and blocked.

SOPHISTICATED

Fortinet's Dynamic Threat Prevention System provides advanced detection techniques combining stateful inspection, signature matching, deep packet inspection, full content reassembly and activity inspection using the industry's only threat correlation engine.

FortiGuard Subscription Services

Fortinet system appliances are equipped with FortiGuard Subscription Services to provide complete Wildlist protection for over 4500 active viruses from a database of over 60,000. FortiGuard offers the fastest AV signature updates from over 50 redundant high speed database servers around the globe. FortiGuard's industry-leading IPS, Antivirus, Antispam, Anti-spyware and Web Content Filtering databases are created, updated and managed by a global team of Fortinet security professionals working around-the-clock, seven days-a-week to ensure the latest attacks are detected and blocked before they can harm your corporate resources or infect your end-user computing devices.

Automated Updates – Keeps defenses up-to-date with the latest viruses, spyware, & heuristic engines

Industry Leading Threat Response Time – Fortinet beats the competition, offering signature updates to block the latest attacks

Proactive Threat Library – Protection from Wildlist threats and thousands of popular OS and application vulnerabilities

24x7 Worldwide Coverage – Over 50 distribution servers are deployed in 12 different countries around the globe

Per Device Subscription Services – Significantly lowers subscription costs versus traditional per user licensing models

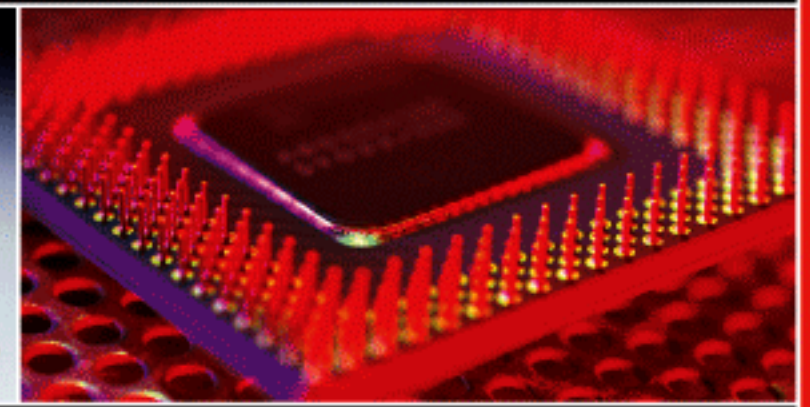

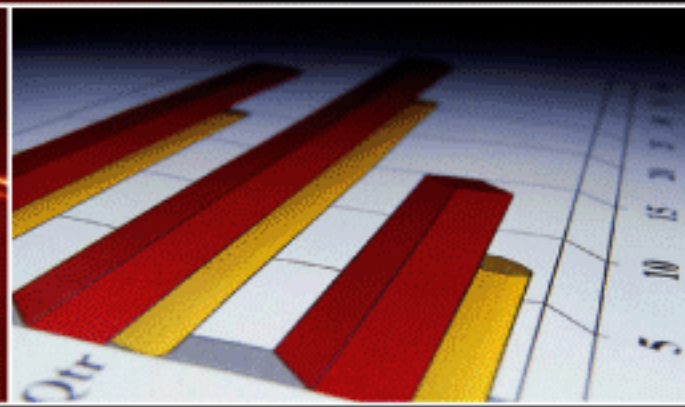

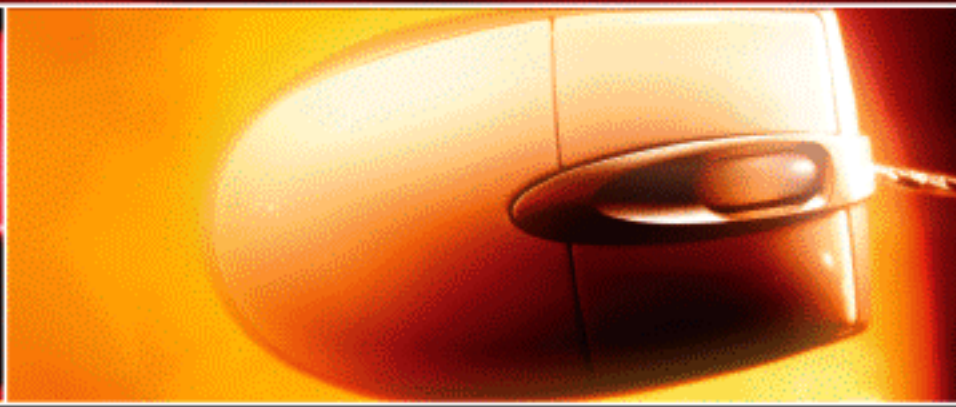

Key Features

-  All-inclusive security solution bundle
-  Cost effective bundled security subscriptions
-  Automated updates of Antivirus and IPS signatures
-  Real-time content rating and spam lists
-  User friendly, secure web user interface
-  Interoperable with Cable and DSL Internet services
-  Multi-threat security appliance, integrates network-based Antivirus, Antispam, IPS, Firewall, Web Content Filtering and Traffic Shaping
-  Certifications: ICSA, Common Criteria EAL 4+, NSS, FIPS, CIPA
-  Full support for VoIP and streaming protocols

Benefits

- Turn-key security solution to detect and eliminate the most damaging threats from e-mail and web traffic
- Fortinet offers a lower total cost of ownership with the most complete set of functions including: Antivirus, Intrusion Prevention, Anti-spyware, Web Content Filtering and Antispam
- Around the clock protection against the latest threats
- Automatic protection from objectionable content
- Simple to setup and easy to manage security solution
- Supports DHCP and PPPoE for easy connection to internet provider
- Delivers comprehensive network security and blended threat protection on an easy-to-deploy and easy-to-manage platform
- FortiGate systems have achieved industry leading security certifications
- Secures H.323, SIP and streaming media services

AUTOMATED

Multi-layered, automated, real-time protection against more than 6000 threats to stop the latest attacks before they can harm corporate resources.

EASY TO USE

Fortinet's systems combine ICSA certified security functions in dedicated systems for small home and branch offices that are a breeze to install and manage.

AFFORDABLE

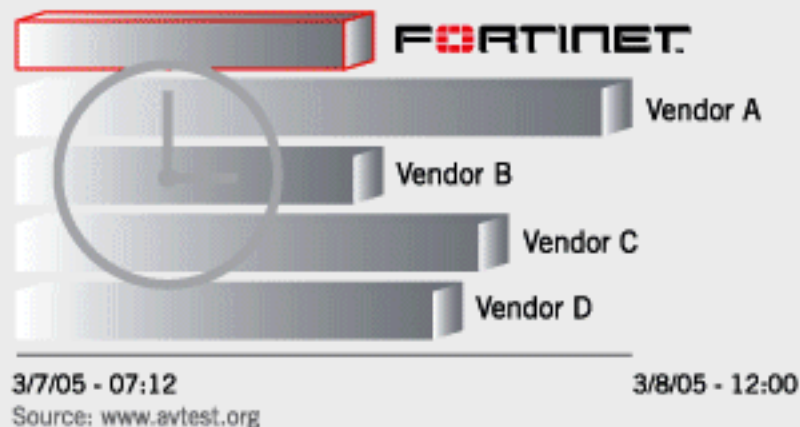

FortiGuard per device, bundled security subscription services significantly reduces deployment costs compared to other security products.

STATE OF THE ART

FortiGate's cost effective Complete Content Protection Solutions provide the most accurate and comprehensive security services in the industry to protect small home and branch offices from the latest viruses and blended threats plaguing networks today.

Quickest to Market

FortiGuard Antivirus Beats Competitors to Sober Variant W32/Sober.M-mm Patch

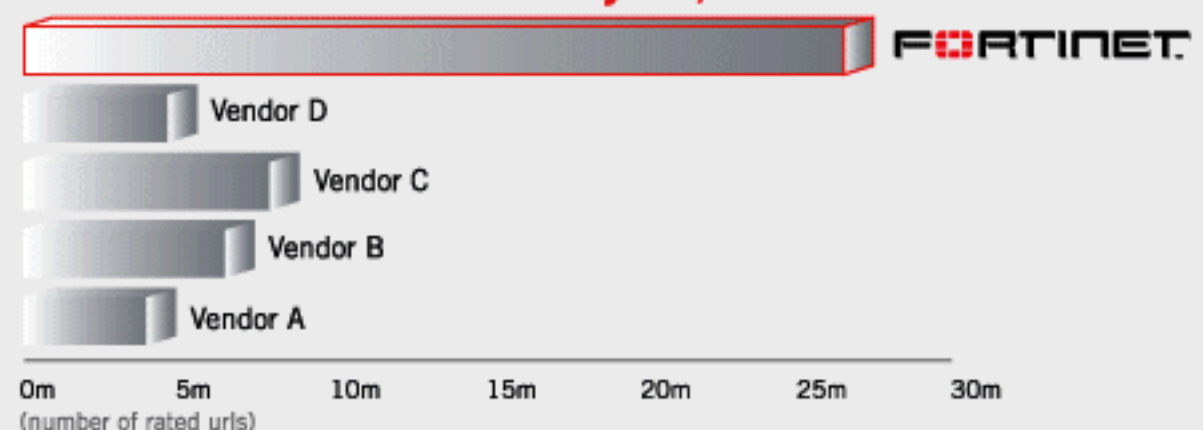

High Performance Antivirus and Intrusion Prevention Systems (IPS)

Fortinet's advanced Antivirus technology and Intrusion Prevention Systems utilize a combination of both signature and heuristic detection engines to provide multi-layered, real-time protection against a multitude of attacks before they can enter the network gateway. Ultra-high system performance is achieved using the integrated FortiASIC™ processor together with Fortinet's patent-pending technology known as CPRL or Content Pattern Recognition Language to accelerate both virus scanning and anomaly recognition. FortiGuard Subscription Services provide automated updates for around-the-clock protection against the latest threats.

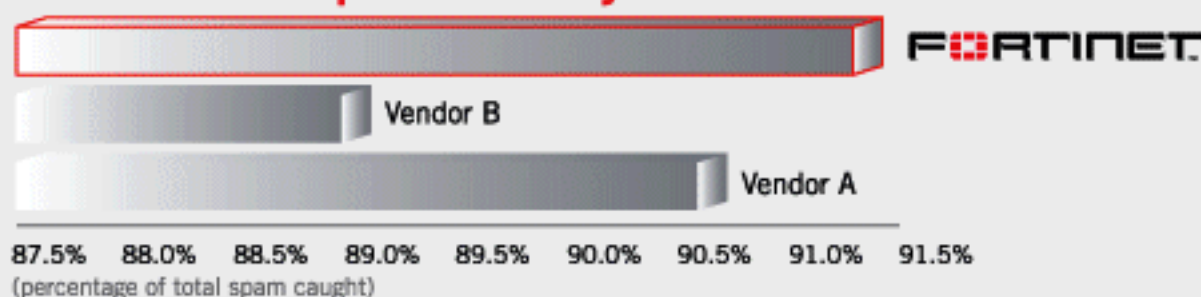

Comprehensive and Accurate Web Filtering

Fortinet's FortiGuard Web Content Filtering Service is an easy-to-administer hosted service that leverages the industry's most extensive and accurate Web filter ratings database. Fortinet security specialists manage all rating content and continuously work to keep the content fresh and accurate by updating the database daily. As of July 2005, there were over 26 million rated domains with over 2 billion rated Web pages to proactively safeguard customers from Web surfing abuse. Grouped into 56 easy-to-understand categories, customers are able to quickly setup, monitor, block and log all web usage.

URL Database Sizes as of July 19, 2005

FortiGuard Antispam Accuracy

FortiGuard Antispam

The volume of email is increasing globally year over year with spam email becoming the majority of all emails received. Fortinet's FortiGuard Antispam Service is designed to significantly eliminate the amount of "obvious spam" before it affects network resources. The FortiGuard Antispam Service utilizes a dual pass detection method to increase the accuracy of spam detection and greatly enhances the effectiveness of catching spam emails over standard Realtime Blackhole Lists (RBL) and other content-based detection methods.
